EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT Los Angeles, CA
M.B.A., Full-Time Program, Technology Management Jul 2027

- *Startup Project:* [Modeling.ai](#) (AI-powered 3D modeling by MCP for architects, designers and engineers)
- *Honors:* Technology Immersion Program

NATIONAL CHIAO TUNG UNIVERSITY Hsinchu, Taiwan
M.S., Civil Engineering, Structural Technology Jan 2020

- *Research:* Developed predictive structural health monitoring methods via numerical modeling and machine learning

NATIONAL CENTRAL UNIVERSITY Taoyuan, Taiwan
B.S., Civil Engineering Jul 2017

- *Leadership:* Led NCU basketball team to semifinal in Taiwan's NCAA-equivalent collegiate tournament

EXPERIENCE

UCLA MOBILITY LAB | F1TENTH Autonomous Racing Project Los Angeles, CA
Autonomous Systems Developer Jan 2026 – present

- Engineered an end-to-end autonomous driving system on embedded platform (Jetson) using ROS 2, integrating perception, localization, planning, and control into a real-time execution pipeline
- Implemented LiDAR-based perception and reactive planning algorithms for high-speed obstacle avoidance under real-time constraints
- Developed SLAM and trajectory tracking pipeline with Pure Pursuit, enabling map-based navigation and stable path following across varying track conditions
- Built and tuned closed-loop control system for steering and velocity, improving stability under varying speed and track conditions
- Led full system integration across hardware and software stack (Jetson, LiDAR, VESC), diagnosing latency, communication, and synchronization issues to achieve reliable autonomous operation

ZENDESK | James Tech Consulting Group (Zendesk's official partner). Taipei, Taiwan
Product Manager Mar 2025 – Jul 2025

- Directed development of AI customer service chatbot extension on Zendesk with 70% average support effort reduction; 2x support product revenue growth over 5 months
- Defined product strategy and roadmap, and convinced senior leaders to expand AI chatbot to a new e-commerce platform, boosting client acquisition by 50% with 70% conversion rate
- Led custom API integration and AI model fine-tuning with BenQ's customer service CRM, reducing manual workload by 70% and saving \$200K/month for BenQ
- Collaborated cross-functionally with engineers, design, marketing, and sales to align business priorities, driving faster delivery cycles and securing clients' contract renewal six months early

CHINA ENGINEERING CONSULTANTS, INC + TAIWAN GOVERNMENT | Infrastructure Systems Taipei, Taiwan
Project Manager Aug 2020 – Feb 2025

- Managed a \$3.3B underground railway project by balancing conflicting requirements from 5+ stakeholders (government, vendors, public), ensuring 100% on-time delivery despite regulatory constraints
- Performed independent in-depth data analysis to resolve an unexpected critical issue, saving \$1.5M and accelerating delivery by 12 months
- Managed a \$63M infrastructure portfolio, defining the strategic roadmap to navigate pandemic-driven supply chain disruptions while maintaining financial stability and achieving a 10% cost reduction
- Delivered 3+ large-scale infrastructure projects with evolving scope by implementing data-driven approvals and stakeholder alignment, cutting execution costs by 15% while meeting timelines

ADDITIONAL

- *Skills:* Autonomous System, ROS2, NVIDIA Jetson, LiDAR, VESC, Robotic Simulation, Motion Planning, Control Systems, Generative AI (OpenAI API, Claude MCP), Python, SQL, A/B testing, User research, Data Analysis, Agile/Scrum
- *Publication:* "Output-Only Modal Identifications Based on Wavelet-Based Temporal Predictability" Proceedings of the 17th World Conference on Earthquake Engineering (17WCEE)
- *Interests:* Basketball (playing & watching), Japanese animation, Golf, Travel (Japan), Community Beach Cleanups
